PUDUCHERRY: Chief Minister N Rangasamy on Friday launched an online Project Management System (PMS) developed by the Cabinet Secretariat, Government of India, to assist in fast-tracking industrial and infrastructure projects with investments above ₹100 crore.

The PMS was developed by the government to kick-start the stalled projects both in public and private sectors and remove the bottlenecks, said Anil Swarup, additional secretary, Cabinet Secretariat, Government of India.

In addition to automating the entire tracking of investment projects, the PMS will include features such as submission of new projects, editing and updating projects, reviewing, submission of details relating to bottlenecks and decisions taken to remove the implementation bottlenecks in the investment projects. The system will raise and revive the confidence of investors, added Swarup. Investors can raise their issues using this platform and get immediate responses to their problems. Any private entrepreneur, department or ministry willing to start a project or resolve bottlenecks of any project can register through the hyperlink, http://cbssecpmg.gov.in/puducherry/index.php, he said.

While giving a presentation Dr Shubhag Chand, HoD, Cabinet Secretariat Information division informed that the system in addition to project management will provide assistance in generation of other reports such as graphical reports, financial reports etc.

Puducherry is the first among the Union Territories to adopt the PMS. Already nine states, including Orissa, Kerala, Uttarakhand, Jharkhand, Chattishgarh, Madhya Pradesh and Maharashtra, have already adopted the system.

A two-day workshop has been scheduled to sensitise and make the officials from the department understand features of PMS.
